SATURDAY, MARCH 29, 1913.

UNITED—FOR WHAT?

The Journal appears for support for the Provincial Opposition on the ground that its members are united.

If the Journal and the other members of the Southern coalition are to be believed, the Opposition members are united in their intention to revive the A. and C. W. contract and to let \$2,000,000 of public money be spent under its weird provisions.

Whether the Opposition members are one even on this question is not as certain as it might be, but their newspaper friends say they are. What is certain is that on most other subjects of practical importance the Opposition members have developed about as many varied and variant notions as they had seats in the Legislature.

If those gentlemen are now to appeal to the electors as a united party, their only discoverable ground of unity on matters now before the people for action is agreement in the championship of a cause for which the Liberals of Alberta refused to stand—a cause rather than tolerate which they forced one Liberal Government to resign and put another in its place to protect the public interests.

"THE INTERESTS" TO MAKE ATTEMPT TO CAPTURE ALBERTA

Mr. R. B. Bennett, 21st, of the Alberta campaign in the Provincial elections.

Mr. Bennett is a long resident of Alberta, a former member of the Provincial Legislature, and it is not therefore open to anybody to challenge his right to take a part in the discussion of Provincial affairs in the course of a Provincial election campaign. That he is a member of the Dominion Parliament does not disqualify him from citizenship in Alberta, nor from the privilege enjoyed by every citizen of taking a hand in the discussion of public questions and in the determination of by whom the Province shall be governed.

But Mr. Bennett is not entering the campaign in Alberta as an Albertan only, contented about the settlement of Provincial questions on Provincial grounds and for Provincial purposes. He comes as a supporter of the Borden Government, with instructions and assistance from the Borden Government, and for the purpose of beating the St. Lawrence Government in the province of strengthening the Borden Government.

After what occurred in Saskatchewan last year, it does not need saying that the deliberate purpose of Hon. Robert Rogers is to capture control of the two prairie Provinces which are now under Liberal Government, and to establish in each a government in line with the views of the Borden Government—those talents are at the service of the party in Federal as well as Provincial elections.

It is in promotion of that policy that Mr. Bennett is coming to Alberta, and not simply in the exercise of his unquestioned right as a citizen of the Province. The object of his visit is not the defeat of one Provincial Government and the election of another for Provincial purposes, but the election of a Borden Government at Edmonton and the expression of an administrative machine devoted to strengthening the hands of the Borden Government and threatening the grip of the Liberals on the minds of the Western people.

IMPORTANT LEGISLATION.

Perhaps not in the history of any Province of the Dominion of Canada was there ever at one session of the Legislature so much generally important legislation passed as during the past session of the Legislature of this Province.

Among other important bills are the Farm Machinery Act, the Elevator Act, the Co-Operative Association Act, the Insurance Act, the Schools of Agriculture Act, the act protecting workmen in connection with the erection and removal of buildings, etc., and the Town Planning Act.

Of all these, the act dealing with agreements as to the sale of farm machinery has created perhaps the most interest. It is true that the Opposition did not divide the House upon it, nor did they line up their forces particularly against it, but their general attitude may be gathered from the fact that at a public meeting at Red Deer Mr. Michener had with him on the platform an ex-employee who denounced the bill as being unfair to the manufacturers and implement men.

The bill is a model of brevity and clearness. It contains in all but six clauses. The first clause gives the title to the act. The second defines farm machinery to be all kinds of implements and machines purchased by a farmer to be used upon farm lands. The third clause provides that no person shall attempt to prevent or obstruct the sale of such machinery to be used upon farm lands. The fourth clause provides that no person shall attempt to prevent or obstruct the sale of such machinery to be used upon farm lands. The fifth clause provides that no person shall attempt to prevent or obstruct the sale of such machinery to be used upon farm lands. The sixth clause provides that no person shall attempt to prevent or obstruct the sale of such machinery to be used upon farm lands.

The fourth section of the act makes short work of this and makes it clear that, notwithstanding anything that implements men may put in an agreement, they will be bound by every representation their agent makes, just the same as at common law a master is bound by what his agent says in the discharge of his master's duty, and just the same as a merchant in town is bound by the action of his salesmen. This is a common justice, and it will cut out some of the mischievous practices that have been carried on by a few agents in the Province.

The fifth clause makes it clear that, notwithstanding how the agreement may be drawn, "all farm machinery shall be sold as warranted and guaranteed to be made of good material, to be properly constructed both as to design and workmanship, to be in good working order, to be satisfactorily perform the work for which it is intended, to be free from latent and other defects, and to be in every way designed and constructed as, with proper care and use, to insure reasonable durability." The sixth section says that the act shall not apply to second-hand machinery.

This is the whole bill. It was not only demanded by the farmers of the country, but the merchants in the southern part of the Province, who, at a meeting of the United Boards of trade of Southern Alberta, passed a unanimous resolution demanding the Government to protect the farmers from the action of some unscrupulous companies and agents. They illustrate the manner in which many machine men do their business, as follows: A farmer comes to town. He is looking

around the implement shop. They persuade him to buy a machine that he does not really need. He says probably he cannot pay for it the next fall. They say they will make one of the notes due next fall and if he cannot pay then the note will be renewed. When "next fall" comes a different man appears on the scene, the collector—and he takes a chattel mortgage on the machine and everything the man has. In the meantime the implement in the adjacent town has been carrying this farmer, providing him with the necessities of life, and when he comes to attempt to collect he finds that the machine has been gobbled up everything, and that on a machine that he insisted upon the farmer taking. The boards of trade, therefore, took strong ground to protect the merchants of the towns from outside companies, some of whom had unscrupulous agents working in the Province.

The bill is fair and will injure no honest manufacturer or agent, but it will make short work of the crooked agent. Some agents are even now said to be endeavoring to stampede the farmers by telling them that the Government passing a bill that is unfair to the dealers and that they are not going to stand machinery of any kind except for spot cash. The farmers need not be alarmed at this sort of talk. The Government have undertaken to stand behind them—have taken time by the forelock by placing a section in the Elevator Act which empowers the directors of the elevator companies, in case of anything of this kind, to bring in all farm requirements of any and every kind and to sell them to the farmers at wholesale prices.

This is one of the most advanced pieces of legislation passed by any Province. The Premier gave Hon. Mr. MacKay credit for drafting this and several other of the public bills. It is the purpose of the Bulletin from time to time during the campaign to give the gist of the more important legislation passed at the recent session.

TWELVE ARE INJURED IN G.T.P. TRUCK WRECK

Many Miraculous Escapes in Flip-Out Near Ottawa—Wreck Was the Cause.

Ottawa, March 28.—In an accident which has gained for this province the name of "miraculous escapes," twelve men were injured in a truck wreck near Ottawa. The truck, a Grand Trunk train number 22, Montreal, was wrecked about a mile east of Maxwell station at 11:45 yesterday morning. Twelve were injured. The cause of the wreck is supposed to have been the washing away of the ballast by recent bad weather.

Remarked on the Side

The proposed Civic Centre may not be the exact mathematical centre of the city, but it is a place where the city is being discussed as to warrant one in thinking of it as the centre of gravity.

Reuben's prompt contribution to the fund for the relief of the flood and the victims over the line is another proof of the saying that a fellow-feeling makes us wondrous kind. But other Canadian cities might do worse than put their hands in their pockets, even though their turn to show upside down has not yet come.

The economic proposition that a commodity may be bought too cheaply, came very near being demonstrated in the case of the Edmonton merchants who bought dynamite at about five dollars a ton—mixed with coal. Anyone who admit that it would, at a general rate, be better to pay a little more for the explosive and have it kept separate.

Marital Law in Rhodes.

Athens, March 28.—The action of the Cypriote military commander, the island of Rhodes is causing considerable feeling in Athens, as the majority of the population of that island are Greeks. Something approaching martial law is in force there, and the island has been established in the island. Public meetings are prohibited, as well as the exercise of the franchise, and the hostilities of any kind are prohibited. The Italian Government has inflicted upon these people who had infringed these regulations. As the Italians are only occupying the island preparatory to the Greek army, and the Cypriote to the Turks, their action is regarded as arbitrary in the extreme.

ACCOUNTANTS DISAPPEAR.

Vancouver, March 28.—John McLean, accountant, the McLean's bank here, disappeared a week ago and has not been seen since. His accounts are in perfect order and his friends believe he met with foul play. His home is in Cornhill, Ottawa, where his father, D. B. McLean, is a prominent banker. He is an expert carman, and last year won in the trials for Winnipeg in the Peoria trials.

EDMONTON SPRING SHOW.

The characteristic mild weather which has gained for this province the name of "Sunny Alberta" is something out of all the apocryphs which might have interfered with a successful live stock show on the Exhibition grounds on Wednesday and Thursday of next week. The grounds are now in splendid condition.

The entries of all kinds, and the fine display of Clydesdales, Shires, Percherons, Belgians, Suffolk Punches, Thoroughbreds, Hackneys, French Cobs and standard bred horses of last year will be on display at the show. The distinguished judges who have been appointed to place the awards in the various classes have all accepted, and will be in Edmonton at the beginning of the week. Robert Graham, of Toronto, who is well known as the champion of the contest, and who has for the past two years judged Percherons at both the Canadian and New York, will have charge of the Percherons, Belgians and Suffolk Punch classes.

Mr. William McKirley, of Napkins, Minn., one of the directors of the exhibition at Brandon, and a large breeder and exhibitor there, will take care of the Clydesdales and Shires, and Mr. J. G. Rutherford, formerly live stock commissioner for the Dominion of Canada, and now superintendent of animal husbandry for the natural history department of the C.P.R., at Calgary, will place the awards for the Percherons, Belgians, Hackneys, and French Cobs. James J. D. McGregor, of Brandon, the president of the "Winter Fair Board," and the owner of "Eleanora's Victor," the grand Irish stallion, will have charge of the Hackneys and the Suffolk Punches. Carls, brother of the well known Prof. Carls, will have charge of the Dutch and English breeds, and all the exhibitors will be sure of a fine show.

THE new houses and West Coast Banglows we are building in beautiful Garneau are meeting with the favor of the public, four of them having been sold from the plans already. When one stops to consider the location of Garneau and the fact that it is closer to the Post Office by several blocks, and the fact that there are no wet basements in this high dry property, it is an exceedingly easy matter to decide that this is the place for the home beautiful.

Our Banglows will have hardwood floors upstairs and down, with especially large living rooms with beautiful hardwood mantels, and the plumbing will be of the higher type, and the heating of the new system, "THE VACUUM STEAM." All are to be within one or two blocks of the car line. It is our suggestion that you make your selection early for the earlier you make your selection the earlier location you will receive. A small deposit will hold any house until completed.

Millionaire and Bootblack Rush to Aid of Flood Victims

Food Enough for 300,000 People Sent From Chicago Alone—First Reports From Stricken Districts Prove to Be Exaggerated—Number Drowned Not as Large as Stated.

ARMED LOOTERS REPORTED TO BE ACTIVE
NEAR DAYTON; MILITIA RESERVES ARE OUT

South Dayton, Ohio, March 20.—(Morning reports that looting, well armed, were active in the district from which the water had partly receded, have reached the headquarters of the emergency committee. The militia are preparing an expedition to quell these disorders.

First Reports Exaggerated. Chicago, Ill., March 20.—Recent estimates which came in during the night from the flooded districts of Ohio and Indiana showed today that reports of loss of life in many cities and towns have been exaggerated. The greatest anxiety still centered about Dayton where an accurate estimate of the number of victims of the flood cannot be made as the impossibility. The death toll promises to be much less heavy at Columbus, Ohio, than the first reports from the western part of that city indicated.

Dayton Figures Down to 200. In the parts of Dayton which have been explored by a motor boat the death list has been greatly reduced from first estimates and indeed the number of victims in the north section of the city is estimated to be large, the total number of dead in the entire city may not reach more than 200. In Indianapolis, where more than 500 persons were reported to have been drowned, less than a hundred is the total number of dead according to advice today.

In Chillicothe, where the number of drowned were reported to be in the neighborhood of 500, the death toll will not exceed 25.

Indiana parties continued to report improved conditions during the night with the estimate as to deaths shrinking as more accurate reports could be made.

Food For 300,000 Is Sent. Chicago, March 20.—A government relief train carrying 17 carloads of provisions or rations for 300,000 left for the Pennsylvania railroad at midnight for Columbus, Ohio.

Two special train loads of motor boats with picked crews raised at the same time to the Ohio flood district under "no stop" orders.

The Chicago Association of Commerce has handed over \$25,000 cash to the American Red Cross Society and other organizations have contributed or pledged as much.

Thousands of Dollars Given. Chicago harbor was depleted of motor boats today. The naval reserve and war department were put into action without waiting for orders and made ready to be rushed to the inundated districts this morning for rescue work.

Thousands of dollars were sent by wire to the stricken districts for immediate use for food and medicine.

Shriners Make Merry on Jasper Avenue

The Shriners' Parade on the corner of First Street and Jasper Avenue yesterday afternoon.

The city streets were again crowded yesterday by presence of members of the order of the Mystic Shrine. Since their first visit to the city the city streets have had an altogether festive appearance, the red turbans and gay uniforms being seen everywhere mingling with the crowds of busy business men.

The Shriners are certainly anxious on parades. They were parading up and down Jasper avenue yesterday led by the Kilties' band and attracting a great deal of interested attention. Everybody seemed to appreciate the extra touch of gaiety added to the city by the Shriners' invasion.

Mayor Short was visited by the Shriners.

SOME PERTINENT QUESTIONS

The undersigned gravel concerns, as citizens, respectfully wish to call the attention of the City Commissioners and City Council to the prints here set out, with reference to the city taking shares in Huff Gravel Company.

In the List of Assets of Huff Grading Company as set forth, this item appears:

Machinery centrally located and erected—approximately \$127,000.00.

This item appears in the List of Assets of Huff Grading Company as set forth, this item appears:

As an asset it has an obligation it is something entirely different.

The difference is a cost of \$77,000.00 and an obligation of \$77,000.00. Again, if this machinery isn't paid for, how much of it is paid for?

What about the 328 acres of gravel property at \$200.00 an acre?

What did this land cost? and is it paid for?

In the arbitration case referred to in paragraph two, Mr. Huff swore he had 540 or 560 acres, and that some of it cost \$25 an acre, and some of it \$50 an acre. Where are the other 200 odd acres? and who sells the gravel from this land? and how is this 328 acres was purchased for waste land, to waste it on in washing? as sworn to by Mr. Huff in the same court case above mentioned. Also, do the commissioners know whether or not that there might be 3,000 acres of this same kind of land available in the same neighborhood and at a much lower cost? Mr. Huff also swore in the arbitration case above mentioned that he could not handle sand profitably, owing to his high freight rate and high cost of production.

How much is \$ per cent. capitalization. How much is 20 per cent. depreciation on \$77,000.00? How much is 20 per cent. depreciation on \$127,000.00? How much is 20 per cent. depreciation on \$200,000.00? What is the actual value of these 328 acres of gravel land? What is the net value of the assets of the Huff Grading Co.? Are they \$222,748.00, or something entirely different? What is the city actually getting for \$200.00?

By what stretch of imagination can a plant in the river near the Marjorie Bridge, set out in the assets as worth \$42,452.00, be considered a valuable adjunct to a gravel company, proposing to operate a land gravel pit, in the face of the following sworn testimony of Mr. James W. Huff, president of the Huff Grading Company, given before a board of three arbitrators in the matter of the Saskatchewan Land and Homestead Co., The Trusts and Guarantee Co. and the Calgary and Edmonton Railway, held at the Courthouse, in the City of Calgary, Alberta, commencing on the 9th of December, A.D. 1912. The following is taken verbatim from Mr. Huff's testimony:

Question: Just explain how you came to that conclusion, why you changed from the river?

Answer: Well, there is a great portion of the year, take, for instance, in the spring, it is late before we can go to work on account of frost on the bars, and by the time the dredges can dig, as frost goes down 7 or 8 feet into the bars, and by the time that it can be dug down it is a very short season before high water comes. This year and last year we had a very long stretch of high water, and I decided that I could work it much more economically with a pit than I could on the river. For that reason I bought the pit.

Even if this asset of \$42,452.00 to be used for dredging in the river was a good one, has the Huff Grading Co., or Mr. Huff, any dredging rights whatsoever in the river, or will he or they be infringing on other leaseholds? From Mr. Huff's testimony it is reasonably evident that he thought taking gravel from the river was not a very practical proposition, owing to the many difficulties encountered.

And that railroad spur item. Five and a half miles of private railroad actual expenditure on same \$50,000.00.

Note—Other small payments are still to be made on this line. What part of this spur is actually paid for? Is interest or yearly rental paid on the steel? What are these other small payments? and how small are they?

India Gives More to Empire Defence Than All Dominions

Supports a Standing Army, Which Includes 76,000 British Troops,
at Cost of 200,000,000 Rupees Annually, So Objects to
London Papers' Comment.

Calcutta, March 27.—Commenting upon the attempt made recently by certain London journals to demonstrate that India ought to contribute a substantial sum toward the cost of naval defence of the British empire, the "Statesman" of Calcutta, criticising the contention, points out that India already bears the full cost of an army which includes 76,000 British troops.

What India Gives. "The outlay involved," continues the Statesman, "is approximately 200,000,000 rupees annually, which is admitted to be a heavy charge of a revenue just over 810,000,000 rupees. As a matter of fact the charge is even more burdensome than would appear from these figures, for the net Indian revenue, as set forth in the budget statement, is 535,000,000 rupees, so that the cost of the army, instead of being one-fourth of the revenue, is nearly two-fifths.

ture on imperial defence comes within measurable distance of this. For instance, while the federal revenue of Australia in rupees is 205,000,000 and the annual revenue of New Zealand, 110,990,999 rupees, the joint annual contribution toward the imperial navy amounts to but 2,400,000 rupees. In the same way Cape Colony and Natal contribute 810,000 rupees annually to the maintenance of the British navy, which General Botha describes as 'a drop in a bucket of water.'

More Than South Africa.
 "Thus," concludes the statement, "even the modest sum of 1,000,000 rupees, which represents India's direct naval expenditure, exceeds that of South Africa, whose entire defence is only 5,490,000 rupees out of a federal revenue of 160,600,000 rupees. These facts show that when India expends two-fifths of her revenue on her army, she is making sacrifices to which no British colony can offer anything approaching a parallel."

ADmits HE STARTED TWO HUNDRED FIRES

Fire Bug Now Held By Winnipeg Police Believed to Have Caused More Than Million Dollars' Damage During the Past Year.

Washington, March 28—President Wilson today finished the message which he will send to the extra session of congress. It is devoted chiefly to the tariff and will be submitted to the cabinet tomorrow.

Winnipeg, March 28—James Dodds, held by the police as a fire bug, is stated to have made a confession this morning that in the course of the past year he has started over two hund-

The president had a long conference with Secretary Redfield at the White House last night about the tariff. Mr. Redfield's tariff views often were sought by the president during his

his efforts to bring about home rule by consent is the declaration of William O'Brien. Mr. O'Brien has approached not only the ministers but the leaders of the opposition, and though their answers are guarded Mr. O'Brien believes that there is a sufficient body of opinion in the United Kingdom to insist upon a peaceable

The president had a long conference with Secretary Redfield at the White House last night about the tariff. Redfield said that the new tariff was thought by the president during his campaign for election.

Politics consumed little of the president's time, as he was mostly concerned over the flood situation. He kept in touch over the telephone, however, with the progress of the jury reform measure in the conference committee of the New Jersey legislature and let it be known that unless jury reforms were obtained he might make an appeal soon to the people of New Jersey to bring pressure to bear on

Buried Alive in Gravel Pit.

A provisional programme has been formulated containing proposals for safeguarding the interests of the Ulster Unionists by referring bills to the Imperial parliament, and by giving the Unionist counties additional representation, and by this Mr. O'Brien hopes to see the matter settled by consent.

Buried Alive in Gravel Pit.
Calgary, March 27.—Thomas Watson, a laborer, was buried alive in a gravel slide in pits of the Consolidated agencies on Macleod trail. Watson was shovelling gravel and was unaware of the slide until too late to escape.

Bill Providing for Increase of 100,000 Men in Army Will Probably Be Passed Without Discussion, It

Berlin, March 28.—The members of the Reichstag will have from today when the new army bill will be presented in their possession, until April 7, the date of the first reading, to make up their minds about the new army measure. It is possible that the bill will be sent to committee almost at once, and in some quarters it is hoped that the bill will be passed into law without any special discussion, so as to impress foreign nations.

It is probable, though no statement

has been made on the matter, that the bill to provide the expenditure required under the new scheme, will be placed before the reichstag along with the new army bill. One estimate of the recurring expenditure required under the new scheme is £7,500,000 per annum, while the non-recurring expenditure is placed at £40,000,000. This would represent an increase of the peace establishment of the army by 100,000 men. The federal governments are apparently agreed as to

Vancouver's Narrowest Building. Vancouver, March 27.—The permit for what will be the narrowest building in Vancouver has been taken out at the city hall by Sam Kee, a Chinese millionaire. The plans show a four-storey steel frame structure, only six feet wide and 120 feet in length. The city recently announced
